FIA ENVIRONMENTAL POLICY

The FIA needs to be part of the solution to solving the climate crisis and accelerating the transition towards a sustainable future for all. Considering the role of the FIA in promoting safe, sustainable and accessible motor sport and mobility, the Federation commits to reduce its environmental impact and to encourage sustainability and environmental awareness within the organisation, among its governing bodies, its members, and other interested parties.

The FIA environmental policy applies to all operational activities, at all FIA locations (Paris, Geneva and Valleiry) and to all events organised by the FIA.

Within this framework, the FIA commits specifically to:

- Comply with all applicable regulatory requirements in relation to environmental aspects,
- Seek continuous improvement of environmental management with the aim to reduce the environmental impact of the activities,
- Protect the environment and prevent pollution within the scope of the activities.

To meet these commitments, the FIA undertakes the following actions:

- Measure and monitor its environmental performance to have a full understanding of environmental impacts of its operations,
- Identify and implement actions aimed at reducing FIA's environmental impacts, starting from most impactful categories,
- Promote sustainability and environmental awareness and involve internal and external stakeholders in reaching the objectives.

The FIA sets specific targets and action plans and allocates necessary resources to deliver the expected outcomes within the framework of this policy. Performance against targets will be assessed annually.

The FIA's environmental policy is communicated to all employees and stakeholders and is shared publicly on the FIA.com website.
